

## Year 2 - Summer 1 - Circle of Life

Key vocabulary	Definition and Key Facts
plant	This is a living thing that grows from the soil and turns light from the sun into food. Plants can be big or small, from giant trees to tiny patches of moss.
seed	A seed is the part of a seed plant which can grow into a new plant. It contains a miniature plant called an embryo that can develop into a fully grown plant.
germination	When the conditions are right the seed soaks up the water and swells and the tiny new plant bursts out of its shell. This is called germination.
shoot	A shoot grows upwards from the seed of a plant to find sunlight.
seed dispersal	Seed dispersal is when the seeds move away from the parent plant. They can drop to the ground in the plant's fruit or be moved by the wind or animals.
