

Year 2 - Summer 2 - Habitats

Key vocabulary	Definition and Key Facts
life processes	These are the things that all living things do. They move, breathe, sense, grow, reproduce, get rid of waste and get their energy from food.
living	The things that are living have all the life processes.
dead	Things that are dead were once living. They did have all the life processes but don't now.
never living	Things made out of metal, plastic or rock were never living. They never had the life processes.
habitat	A habitat is the natural place something lives. A habitat provides living things with everything they need to survive such as food, shelter and water.
microhabitat	A microhabitat is a very small habitat in places like under a rock, under leaves or on a branch. Minibeasts live in microhabitats.
depend	Many living things in a habitat depend on each other. This means they need each other for different things.
survive	This means to stay alive.
